Dear Kristal,

At its recent Board Meeting, the Northwest San Pedro Neighborhood Council passed a motion to request that speed humps be installed in the 1000 block of Elberon as requested by the residents of that area (see attached petition).

This request is being made for safety reasons. Since the new Peck Park Elberon Trailhead has been opened, there has been a significant increase in the number of children crossing the street to go from Rena Park to the Peck Park trail. In fact, busses have been seen to drop children off at Rena Park for this purpose.

We understand that funds are tight right now, but need to find a way to provide a safe passage for our children from one park to the other.

Thanks you for your assistance.

Diana Nave, President
