

## Northwest San Pedro Neighborhood Council

"Your Community Voice"

---

May 23, 2011

Councilwoman Janice Hahn  
200 N. Spring Street  
Los Angeles, CA 90012

**Diana Nave**  
President

**Bob Bryant**  
Vice President

**Craig Goldfarb**  
Treasurer

**George  
Thompson**  
Secretary

As you are aware, the proliferation of cell towers has also long been of concern to us (see attached motion). We appreciate the leadership your office has shown on this issue. Unfortunately, it appears that in spite of all of the efforts and promises that have been made, the City has still not taken action on this issue.

In 2009, the Council (CF 09-2645) directed City Attorney Trutanich to prepare a report on the City's regulation of wireless communication facilities in light of the then-recent federal court decisions. A similar request was made in 2006 to then City Attorney Delgadillo.

In 2010, the Los Angeles WTF Working Group formed. They conducted extensive investigation (see attached documents) and met with the City Attorney to discuss this matter. This has also been a topic at the quarterly community meetings with Trutanich. Yet, while we have heard promises that his staff was working on this item, nothing has been forthcoming.

We are concerned that CF 09-2645 (which expires in November) appears to be headed in the same direction as the 2006 motion. How can you assist in moving this issue forward? Perhaps the Public Works Committee should take up this issue without waiting for the report.

Can you give us a report of what the City did in response to your prior motion asking that this be included in the City's 2009-2010 Legislative Program and whether or not this was position will be included in the 2011-2012 program?

Thank you again for your assistance with these important matters.

Diana Nave, President
